Available for Junior Software Engineering and Full-Stack Development Opportunities

PROFESSIONAL SUMMARY

Junior software engineer and Computer Science graduate with hands-on full-stack development experience building responsive web and mobile applications using JavaScript, React.js, Flutter, Node.js, Express.js, MySQL, and REST APIs. Currently completing a Full-Stack Development Internship at DecodeLabs, with practical experience in front-end and back-end development, API integration, JWT authentication, real-time features, debugging, deployment, and Git/GitHub workflows. Ready to contribute to production-focused software projects while growing within a collaborative engineering team.

TECHNICAL SKILLS

Languages: JavaScript, Dart, C, PHP, HTML5, CSS3

Front-End and Mobile: React.js, Flutter, Tailwind CSS, Responsive Web Design, DOM Manipulation

Back-End and Databases: Node.js, Express.js, Laravel, MySQL, TiDB Cloud, REST APIs

Tools and Services: Git, GitHub, Postman, Socket.IO, Firebase, Google Maps API, Multer

Security: JWT, bcrypt, Authentication, Role-Based Authorization

EXPERIENCE

Full-Stack Development Intern | DecodeLabs | September 2026 - Present

- Developing practical full-stack projects through structured front-end and back-end phases while following project requirements, testing functionality, and maintaining work in public GitHub repositories.
- Built and deployed a responsive Task Manager using HTML5, CSS3, and JavaScript with DOM manipulation, input validation, task completion and deletion, and browser persistence using localStorage.

PROJECTS

SAWA Transportation Platform | Senior Capstone | March 2026 - June 2026 | GitHub Profile

- Co-developed a cross-platform transportation platform using Flutter, Dart, Node.js, Express.js, MySQL, REST APIs, JWT/bcrypt authentication, Google Maps API, Socket.IO, and Firebase notifications.
- Built a React.js and Tailwind CSS admin dashboard for driver verification, route approvals, user and report management, and live fleet monitoring.

Motorcycles Mobile Application | Personal Project | December 2025 - January 2026 | GitHub

- Developed and deployed a Flutter catalog application backed by Node.js, Express.js, MySQL/TiDB Cloud, and REST APIs, with responsive browsing and detailed product specifications.
- Implemented JWT/bcrypt authentication, role-based admin authorization, protected product-management routes, and Multer image uploads.

EDUCATION

Bachelor of Science in Computer Science | Lebanese International University (LIU), Lebanon | 2026

TRAINING

42 Piscine (Intensive Software Engineering Bootcamp) | 42 Beirut | July - August 2026

- Completed a 4-week, peer-to-peer bootcamp with 200+ hours of C programming, algorithms, memory management, debugging, group projects, Git workflows, and machine exams.

CERTIFICATIONS AND COURSES

Certificate of Participation and Endurance, 42 Piscine - 42 Beirut (2026) | Advanced Web Development - youbee.ai (2025)

Full-Stack Web Development - youbee.ai (2024) | Cybersecurity - youbee.ai (2024)
